Gorakh Prasad Integral Calculus Download.zip.Q: Using R with SAS and SAS aria? I'm using SAS aria to automate a process. I have a macro that builds out the data and then goes through it and does a quick macro in SAS to change the data for a specific task. I'm wondering if i can have this change the data in a way that R can use that data instead of me having to manually change it myself. I've been searching and haven't found anything that solves my issue. A: From the R side, you can use the MSAccess package for this. Via the R side, you can use the following code which will update the table called t2 in the package MSAccess: UPDATE t2 SET t2.[MSAccess

```
Table] = t.[R Table] FROM R.Table1 AS t WHERE  
t.s=1; { "name": "visitors", "version": "1.0.0",  
"lockfileVersion": 1, "requires": true, "dependencies":
